Summary

I am a graduate in Computer Science & Mathematics and Applied Mathematics from University of Electronic Science and Technology of China. My research interests primarily revolve around **(1)** the interpretability and representation capability of deep neural networks (e.g., sparsity in large language models), **(2)** the fundamental structure design of neural networks (e.g., mixture of experts), and **(3)** the application of artificial intelligence in other research areas (e.g., AI for biology, psychology).

Education

University of Electronic Science and Technology of China *Sep. 2019 – Jul. 2023*
Bachelor of Computer Science & Mathematics and Applied Mathematics *GPA: 3.91/4.00*

Research Experience

OpenGVLab, Shanghai Artificial Intelligence Laboratory *Jul. 2023 – Present*
Research Assistant
Instructor: Dr. Xiaoye Qu. Supervisor: Prof. Yu Cheng
Mixture of Experts, Large Language Models, Natural Language Processing

- Explored the structures of Large Language Models (LLMs) and efficient properties of Mixture of Experts (MoE).
- Conducted research on effective strategies to for incorporating MoE structures into pre-trained dense Large Language Models.

Center for Artificial Intelligence Research and Innovation, Westlake University *Apr. 2023 – Present*
Research Assistant
Instructor: Zhangyang Gao. Supervisor: Prof. Stan Z. Li
Molecular Generation, AI for Drug Discovery and Development

- Explored the strategies for 2D and 3D molecular representation learning and generation.
- Conducted research on a unified molecular modelling framework using pure transformers.

Data Intelligence Group, University of Electronic Science and Technology of China *Jul. 2022 – Mar. 2023*
Research Intern
Instructor: Prof. Wen Li
Domain Adaptation, Transfer Learning

- Explored the theories and algorithms for unsupervised and self-supervised learning.
- Conducted research on knowledge transfer strategies for Multi-Target Domain Adaptation (MTDA).

NLP Group, JD Explore Academy *Feb. 2022 – Oct. 2022*
Independent Collaborator
Instructor: Dr. Liang Ding. Supervisor: Prof. Dacheng Tao
Sparse Training, Model Compression, Natural Language Understanding

- Explored parameter-efficient strategies for downstream fine-tuning.
- Conducted research on efficient dynamic neural networks in Computer Vision (CV) and Natural Language Processing (NLP).

Publications

1. **PAD-Net: An Efficient Framework for Dynamic Networks.**
   Shwai He, Liang Ding, **Daize Dong**, Boan Liu, Fuqiang Yu, Dacheng Tao.
   Proceedings of The 61st Annual Meeting of the Association for Computational Linguistics (ACL 2023).
2. **SparseAdapter: An Easy Approach for Improving the Parameter-Efficiency of Adapters.**
   Shwai He, Liang Ding, **Daize Dong**, Miao Zhang, Dacheng Tao.
   Findings of The 2022 Conference on Empirical Methods in Natural Language Processing (EMNLP 2022).
3. **SD-Conv: Towards the Parameter-Efficiency of Dynamic Convolution.**
   Shwai He, Chenbo Jiang, **Daize Dong**, Liang Ding.
   IEEE/CVF Winter Conference on Applications of Computer Vision, 2023 (WACV 2023)
4. **Blending and Aggregating the Target for Blended-Target Domain Adaptation.**
   Tong Chu, **Daize Dong**, Jinhong Deng, Lixin Duan, Wen Li.
   arXiv preprint, 2023.

Projects

LLaMA-MoE: Building Mixture-of-Experts from LLaMA with Continual Pre-training. *Jul. 2023 – Dec. 2023*

- Conducted research on the framework to integrate the mixture-of-experts (MoE) structure into existing LLMs.
- Explored multiple methods to initialize the converted MoE model using pretrained parameters from the LLM.
- Proposed a novel output-scaling strategy to recover model performance.

Honors and awards

Excellent Student Cadre *2020 – 2021*
University of Electronic Science and Technology of China

Excellent Student Scholarship *2020 – 2021*
University of Electronic Science and Technology of China

The Second Prize Scholarship *2019 – 2020*
University of Electronic Science and Technology of China

Technical Skills

Deep Learning: Natural Language Processing, Computer Vision, Transfer Learning, AI for Molecular Design, etc.
Programming Languages: Python, C/C++, Java, JavaScript, Matlab, etc.
Developer Tools: Linux, Git, Pytorch, OpenCV, etc.

Relevant Courses

Deep Learning: Machine Learning, Artificial Intelligence, Deep Learning for Computer Vision, Deep Learning for Natural Language Processing, Knowledge Representation and Reasoning, Data Mining and Big Data Analysis.
Optimization Algorithm: Optimization Theory and Methods, Introduction to Algorithms.
Mathematics: Differential Calculus, Linear Algebra, Probability Theory, Stochastic Process, Discrete Mathematics, Graph Theory, Multivariate Statistical Analysis, Causal Inference.
Computer Science: Computer Organization and Architecture, Compiler Principles, Computer Operating Systems, Database Principles and Applications, Information Retrieval, Software Engineering.
