Hiring Manager  
Pixel Robotics

Dear Hiring Manager,

Thank you for the opportunity to apply for the Robot and computer vision QA engineer role at your company. After reviewing your job description, it's clear that you're looking for a candidate that is extremely familiar with the responsibilities associated with the role, and can perform them confidently. Given these requirements, I am certain that I have the necessary skills to successfully do the job adeptly and perform above expectations.

I am a detail-oriented college student (Master of Robotics and Computer Vision) currently finalizing my thesis at Innopolis University. During the course of my academic career, I also managed to accrue nearly 4 months of work experience. I had the privilege of working for Laboratory of Intelligent Robotics Systems in a research assistant role in my free time, where I learned valuable professional skills such as teleoperation of Kuka iiwa with touch haptic device, robotics control with force feedback and virtual and augmented reality.

In both my academic and professional life, I have been consistently praised as hard-working by my professors and peers. Whether working on academic, extracurricular, or professional projects, I apply proven problem-solving, quality coding and research skills, which I hope to leverage into the QA Engineer in Robotics and computer vision role at your company.

After reviewing my resume, I hope you will agree that I am the type of competent and competitive candidate you are looking for. I look forward to elaborating on how my specific skills and abilities will benefit your organization. Please contact me at 7-965-581-8698 or via email at [mostafametwaly96@gmail.com](mailto:mostafametwaly96@gmail.com) to arrange for a convenient meeting time.

Thank you for your consideration, and I look forward to hearing from you soon.

Sincerely,  
Mostafa Othman
