

# JORDAN VAN BEECK

**POSITION:** PhD student Astronomy & Astrophysics, KU Leuven

## CONTACT INFORMATION

---

OFFICE ADDRESS: [Institute of Astronomy](#), Celestijnenlaan 200D, B-3001 Leuven, Belgium  
EMAIL: [jordan.vanbeeck@kuleuven.be](mailto:jordan.vanbeeck@kuleuven.be)  
MY WEBSITE: [my personal website](#)  
RESEARCHGATE: [my Researchgate page](#)  
LINKEDIN: [my LinkedIn page](#)  
GITHUB: [my Github page](#)  
ORCID ID:  [0000-0002-5082-3887](#)

## RESEARCH INTERESTS

---

Much of my work is related to waves propagating inside stars (i.e. asteroseismology), where I focus on coupling theoretical astrophysics to observations. Within this broad research topic, I characterize the influence of stellar magnetic fields, as well as wave interactions and their implications for stellar structure and evolution. I ponder about astrobiological questions on habitability of (exo)planets and (exo)moons, especially when this can be related to stellar activity, and am broadly interested in planetary sciences. Formerly trained as a chemist (and astrophysicist), I am also interested in analytical or theoretical chemistry-related research, for example, investigating the dust formation mechanism in winds of evolved stars.

## SCIENTIFIC EDUCATION

---

09/2017–07/2019	<p>ASTRONOMY &amp; ASTROPHYSICS, MSc. KU Leuven</p> <p>Thesis title: The influence of an interior magnetic field on gravity-mode oscillations of intermediate-mass stars</p> <p><i>Promoters: Prof. Dr. C. Aerts, Dr. T. Van Reeth, Dr. D. M. Bowman</i></p>
09/2015–09/2017	<p>CHEMIE / CHEMISTRY, MSc. University of Antwerp (Universiteit Antwerpen)</p> <p>Thesis title: Characterization of radioactive particles</p> <p><i>Promoters: Prof. Dr. K. Janssens, Prof. Dr. B. Salbu, Prof. Dr. O.-C. Lind, MSc. G. Nuyts</i></p>
09/2012–09/2015	<p>CHEMIE / CHEMISTRY, BSc. University of Antwerp (Universiteit Antwerpen)</p> <p>Thesis title: Atomic scale reactive MD studies of DNA oxidation for plasma oncology: the role of H<sub>2</sub>O<sub>2</sub> and HO<sub>2</sub></p> <p><i>Promoters: Prof. Dr. A. Bogaerts, Prof. Dr. E. Neyts, Dr. C. Verlackt</i></p>

## AWARDS AND HONORS

---

2019	<p>Paul Smeyers Prize, KU Leuven</p> <p>Awarded to the annual best master's thesis in Astronomy &amp; Astrophysics at the June examination session.</p>
------	---

## TEACHING EXPERIENCE

---

### Courses and modules

- |                   |  |
|-------------------|--|
| 09/2019 (ongoing) | Teaching assistant for courses 'Natuurkunde met elementen van wiskunde' I and II (in Dutch, translation: 'Physics with elements of mathematics' I and II) for first year bachelor students in Pharmaceutical sciences, KU Leuven |
|-------------------|--|

## RESEARCH EXPERIENCE

---

- |                   |  |
|-------------------|--|
| 09/2019 (ongoing) | <b>PhD student at Institute of Astronomy / Instituut voor sterrenkunde, Prof. Dr. Conny Aerts and Prof. Dr. Tim Van Hoolst, KU Leuven</b><br>Topic: Application of nonlinear asteroseismology to Kepler and TESS space photometry<br>Main focus: extending current linear asteroseismological tools (that put models of the stellar interior to the test) to the nonlinear domain for intermediate-mass gravity-mode pulsating stars.  |
| 10/2018-6/2019    | Master's thesis research project at the Institute of Astronomy / Instituut voor sterrenkunde, Prof. Dr. Conny Aerts, Dr. Dominic Bowman, Dr. Timothy Van Reeth, KU Leuven<br>Topic: The influence of an interior magnetic field on gravity-mode oscillations of intermediate-mass stars<br>Contributions: two publications as a co-author, a first-author publication, and a poster presentation.  |
| 02/2018 (ongoing) | Theoretical chemistry research project at Institute of Astronomy / Instituut voor sterrenkunde, Prof. Dr. Leen Decin and Dr. David Gobrecht, KU Leuven<br>Topic: Dust cluster nucleation in (carbon-rich) winds of asymptotic giant branch stars<br>Contribution: a technical report.  |
| 2016-2017         | Master's thesis research project at the AXES research group, Prof. Dr. Koen Janssens, MSc. Gert Nuyts, University of Antwerp (Universiteit Antwerpen) and the Centre for Environmental Radioactivity (CERAD), Ole-Christian Lind, Norwegian University of Life Sciences (NMBU)<br>Topic: Characterization of radioactive particles. (Mainly using X-ray analysis techniques to characterize environmental radionuclides.)<br>Research stay: a short research stay in May 2016 at the Deutsches Elektronen-Synchrotron (DESY), providing access to high spatial and spectral resolution X-ray analysis. |

## GRANTS AND FELLOWSHIPS

---

- |             |   |
|-------------|---|
| 2019 - 2023 | 4-year PhD Fellowship, <a href="#">Department of Physics and Astronomy, KU Leuven</a> |
|-------------|---|

## MEMBERSHIP OF SCIENTIFIC ORGANIZATIONS

---

- Since 2019 | Graduate student member of the International Research Network for Nuclear Astrophysics ([IReNA](#)).
- Since 2020 | Graduate student member of the American Astronomical Society ([AAS](#)).
- Since 2020 | Graduate student member of the Royal Netherlands Astronomical Society/Koninklijke Nederlandse Astronomenclub ([KNA](#)).

## CONFERENCES AND WORKSHOPS

---

- October 2018 | STFC/MAMSIE mini-workshop
- April 2019 | STFC/MAMSIE mini-workshop
- June 2019 | 74th Dutch Astronomy Conference/Nederlandse Astronomenconferentie, Groningen/Paterswolde, the Netherlands.
- July 2020 | Let's Talk Science: 8th Summer School for Science Communication and Communicative Competences ([online](#))
- July 2020 | MOBSTER-1 Virtual conference 2020: Stellar variability as a probe of magnetic fields in massive stars ([online](#)).
- August 2021 | 10<sup>th</sup> MESA summer school ([online](#))
- July 2022 | TASC6/KASC13 conference of the asteroseismic community. More information can be found on [this website](#).

## TALKS AND PRESENTATIONS

---

- June 2019 | "Constraining magnetic fields in intermediate-mass main-sequence stars with asteroseismology" ([POSTER](#)), 74th Dutch Astronomy Conference/Nederlandse Astronomenconferentie, Groningen/Paterswolde, the Netherlands.
- July 2020 | "Linking detected gravity modes to axisymmetric internal magnetic fields" ([CONTRIBUTED TALK](#)), MOBSTER-1 Virtual conference 2020: Stellar variability as a probe of magnetic fields in massive stars ([online](#), hosted by University of Delaware, USA).

## CONFERENCE ORGANISATION

---

- July 2022 | TASC6/KASC13 at Leuven, Belgium: part of the LOC. More information can be found on [this website](#).

## MAIN PEER-REVIEWED SCIENTIFIC PUBLICATIONS

---

As of July 2, 2021, my citation metrics are:

- **Google Scholar:** 45 citations, h-index 3
- **NASA ADS:** 37 citations, h-index 3
