Education

Ankara Atatürk Anatolian Highschool

Sep. 2015 – Jun 2019

Science/Maths student

Ankara, Turkey

- Graduation Grade: 97.38/100
- Diploma Grade: 512.43/560

Bilkent University

Sep. 2019 – May 2024

Bachelor of Science in Electrical and Electronics Engineering

Ankara, Turkey

- **GPA:** 3.81/4.00
- Ranked 9 out of 158 students.

Research Interests

- Machine Learning
- Data Science
- Convex Optimization
- Signal Processing

Relevant Coursework

- CS 464 Introduction to Machine Learning
- Analytics
- Research Study
- EEE 431 Digital Communications
- EEE 485 Statistical Learning and Data
- EEE 424 Digital Signal Processing
- EEE 486 Statistical Foundations of Natural Language Processing
- ECON 439 Game Theory I
- EEE 392 Individual

Experience

UMRAM, Bilkent University

August 2021

Undergraduate Research Assistant

Ankara, Turkey

- Practiced Deep Learning methods for detecting brain illnesses in MRI scans.

ASELSAN, Radar and Warfare Systems

Jun 2022 – July 2022

Algorithm Design Intern

Ankara, Turkey

- Practiced different tools and methods for geolocation detection of radars using warfare systems in MATLAB.

DataBoss Security and Analytics

August 2022 – Sep. 2022

Machine Learning Intern

Ankara, Turkey

- Practiced Machine Learning techniques on Time-Series data using Gradient Boosting and Neural Networks models with Python.

DataBoss Security and Analytics

December 2022 – Present

Machine Learning Researcher

Ankara, Turkey

- Working on sequential data to build state-of-the-art Machine Learning algorithms.
- Developing novel methods to overcome the curse of dimensionality in high dimensional feature spaces with Gradient Boosting algorithms.

Projects

Digital FPGA Piano for Beginner | VHDL, BASYS3

February - May 2021

- Designed a digital piano which outputs notes of 8 octaves from a buzzer based on timer frequency, and the piano image in a VGA screen.

Analog Multiplier | BJT, LTSpice, DipTrace

February - May 2022

- Designed an analog multiplier with 6 BJTs by simulating it in LTSpice and designing the PCB in DipTrace.

Magnetically Levitated Lamp | **September - December 2022**

- Designed a levitated lamp by constructing 3 magnetic loops for lighting, levitating and magnetization.

Image Reconstruction | *MATLAB* **December 2022**

- Reconstructed an image from its basis element with FFT.

Song Recommendation System for Spotify Playlists | *Python, TensorFlow* **September - December 2022**

- Used Spotify API to extract the musical properties of songs and playlists.
- Trained unsupervised clustering algorithms such as k-Means, DBScan, Autoencoder to give several song recommendations to a playlist.

A Basic Level Category Analysis with Commonsense Question Answering **February - May 2023**

- Measured the common sense question answering performance of one of the GPT language models, GPT-3.5-turbo, by integrating a well-known language game, Family Feud.
- Analyzed basic level category words based on Family Feud dataset.

Wind Energy Production Prediction **February - May 2023**

- Designed a system to predict hourly total electrical energy consumption in Spain with Linear Regression, Decision Tree, and AdaBoost.
- The models are designed without any builtin library support of Python.

Achievements

5th Place at Invent Analytics Data Analysis Challenge | *Jupyter* **September 2022**

- Trained and tested a Machine Learning model to forecast the sales amount of a clothing brand.

3rd Place at Ipsos Datathon | *Jupyter* **May 2023**

- Solved a case study about predicting a company's market share by trend analysis using ARIMA and Linear Regression.

Technical Skills

Languages: Python, SQL, VHDL, MATLAB, Assembly 8051

Developer Tools: Pycharm, Eclipse, Google Cloud Platform, Android Studio

Technologies: Linux, GitHub, LaTeX, MS applications

Frameworks: Pytorch, Tensorflow, Scikit-learn

Electronics Tools: LTSpice, DipTrace, Proteus, MCU IDE

Publications

Aysin Tumay, Mustafa E. Aydin, Suleyman S. Kozat. "Hierarchical Ensemble-based Feature Selection for Time Series Forecasting", *IEEE Transactions on Signal Processing*, 2023. (*submitted*)

Extracurricular

- Active member at Young Entrepreneurs Society, and IEEE Student Branch.
- Ankara Start-up Summit committee member for 2019, and 2020.
- Classical guitar player at high school orchestra.
